Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13-15, 21-27, 29-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Tucker (5,261,719).

Tucker discloses a rail (17) mounted along the top edge of a truck bed side wall (13).

An outwardly inclined channel is defined in the rail (17) so that it may slidably receive an elongated slat (16). The rail is made of extruded aluminum and has mounting flange. Clamps secure the mounting flange, as shown in Figure 13. The slat (16) has an exposed fastening surface. The slat's longitudinal movement is limited by removable corner assemblies (18).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tucker (5,261,719) in view of Schmeichel et al. (5,076,338).

Tucker does not disclose hook and loop fasteners.

Schmeichel et al. teach the ability to use hook and loop fasteners to attach a cover.

Art Unit: 3612

It would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the snaps, of Tucker, with hook and loop fasteners, as taught by Schmeichel et al., to provide a suitable fastener that won't be as difficult to undo when subjected to freezing rain.

Allowable Subject Matter

5. Claims 1-12 are allowed.
6. Claims 16-18 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
